

CONTECH EVENTS 2023

1. Global Construction Summit, 21-23 February 2023

Net Zero and digital technology adoption top the agenda at the Global Construction Summit 2023 on 21-23 February.

The Summit is the key annual event for built environment professionals seeking to understand the latest trends, learn best practice and uncover innovations from across the world.

Produced by the Chartered Institute of Building and *Global Construction Review*, the Summit comprises webinars, all of which feature high-quality speakers drawn from across the global built environment sector.

2022 Agenda included safety, diversity, BIM implementation etc. issues.

2. Construction Institute Summit, March 1st-4th, Saint-Louis Missouri

Join contractors, owners, designers, and other construction industry stakeholders from all over the country to meet and share new developments and innovative practices in the construction industry. Network with peers, earn PDHs, and expand your knowledge base to enhance the success of your projects.

3. Construction Week Technology Summit – March 14th 2023 Dubai

The construction industry is experiencing massive transformation on the back of digitalization and the adoption of technology. The Construction Week Technology Summit UAE will enable a conversation about the industry's progress in driving technology integration for productivity, connectivity, and safety. It will also host a series of panels and discussions on the evolution of connected construction, and optimizing the design, construction, and project delivery process.

- Session 1: The evolution of technology within the construction.
- Session 2: Technology and sustainable construction.

4. Construction Expo, March 14th-18th, 2023 Las Vegas

Do you want to see all North America has to offer in construction equipment and ideas? The Conexpo-Con/AGG is all about helping your business move to the next level. Designed for all construction industry professionals, the Conexpo-Con/AGG will give you the chance to network, learn how to

improve your business with over 150 education sessions, and discover the latest technologies in construction. There are over 1,800 exhibitors in 2.7 million square feet.

5. 3rd High Level Construction Forum and presentation of the transition pathway – March 15th

On **Wednesday 15 March**, the **3rd meeting of the High-Level Construction Forum** will take place to present the **‘transition pathway towards a more resilient, green and digital construction ecosystem’**. The pathway document will be published ahead of the meeting, offering an actionable plan to improve the construction ecosystem’s resilience, competitiveness greening and digitalization. Registrations open in February.

Other upcoming HLCF events

In April 2023:

- **A webinar on whole life carbon of EU buildings (status update).**
- **A webinar on digital transition in construction.**

6. Artificial intelligence in architecture, engineering and construction, March 22nd – 23rd (virtual)

The high interest towards the first truly global Artificial Intelligence conference in Architecture, Engineering and Construction industry in 2021 gave the spark for the annual conferences. In 2021 event, there were 235 registered participants from 30 countries, who graded the overall conference experience over 4 on a scale 1-5. In 2022 the conference attracted 248 participants from 31 countries and the overall conference experience was rated over 4 again. The first two editions have already been successful, but in 2023 we are heading to make the #AIAEC2023 experience even better!

8. ENR FutureTech, June 5-7th 2023 San Francisco

ENR FutureTech is construction's premier event for connecting with leaders in construction tech, architecture, engineering for two days of learning and networking, including a welcome reception on June 5. Join us for a series of thought-provoking and interactive sessions presented by the industry's elite that are enhancing construction productivity, profits and safety.

9. Road Congress – June, 13-14th 2023 Ostrava

Connected Business and Research Road Conference: One of the goals of the conference is to inform on new trends, technologies and procedures for the construction and maintenance of road, bridge and tunnel structures and a wide range of accessories.

Last edition in October 2022, next in June 2023.

A section is reserved for innovative technologies: innovations in the transportation sector, innovation ecosystems, traffic analysis, etc. ([Présentation - Conférences routières \(silnicnikonference.eu\)](#)).

10. Construction tech Conference – July 19th-20th 2023 Chicago, Illinois

Previously known as our Projects Conference, we covered the topic in three parts: pre-construction and estimating, project oversight and business intelligence, and smart jobsites. Additionally, we hosted a separate conference to explore advanced equipment and robotics. As these topics have increasingly converged, the Construction Tech Conference is intended to look holistically at how technology is influencing the way we build – from pre-construction through construction functions, in the office as well as in the field. It will be a lot to cover in two days, and, with so much happening, it will surely be an exciting event.

Leading technology adopters, mature solution providers, and upcoming technology solutions gather each year to take the pulse of trends across the industry at the BuiltWorlds Construction Tech Conference.

11. World of digital Built Environment (WDBE) 2023 SUMMIT, September 19th – 20th, Helsinki & Tallinn

For the sixth year in a row, World of digital Built Environment (WDBE) Summit presents a comprehensive overview of the most important current events, phenomena, and solutions in the field of digital built environment. Come along with professionals of the built environment to spend two inspiring summit days on a joint journey from Tallinn to Helsinki together. WDBE is a community event not to be missed!

12. Lean Construction Institute Congress, October 24th – 27th, Detroit USA

Gain new ideas and perspectives that will enrich your work and drive your Lean practice forward. Playing a vital role in the ever-evolving design and construction industry for 25 years, Congress is where your Lean community comes together for unparalleled knowledge-sharing across disciplines. Attendees come back year after year to reconnect while sharing experiences and successes—and return home with critical, actionable knowledge.

Join more than 1,400 of your colleagues and industry leaders for the Lean event of the year. You will have the opportunity to earn continuing education credits, engage in cutting-edge Lean methods, and network with your peers and Lean leaders. Registration details will be available soon.
