

## CONTECH EVENTS 2023

### 1. Digital Construction Week, May, 17<sup>th</sup> – 18<sup>th</sup> 2023 London

This is your opportunity to learn about the latest trends in digital construction. Meet companies driving architecture, engineering, construction, design and manufacturing forward. Discover how to use new technology to improve your projects, teams, business, and the built environment.

### 2. ENR FutureTech, June 5-7<sup>th</sup> 2023 San Francisco

ENR FutureTech is construction's premier event for connecting with leaders in construction tech, architecture, engineering for two days of learning and networking, including a welcome reception on June 5. Join us for a series of thought-provoking and interactive sessions presented by the industry's elite that are enhancing construction productivity, profits and safety.

### 4. Road Congress, June, 13-14<sup>th</sup> 2023 Ostrava

Connected Business and Research Road Conference: One of the goals of the conference is to inform on new trends, technologies and procedures for the construction and maintenance of road, bridge and tunnel structures and a wide range of accessories.

Last edition in October 2022, next in June 2023.

A section is reserved for innovative technologies: innovations in the transportation sector, innovation ecosystems, traffic analysis, etc. ([Présentation - Conférences routières \(silnicnikonference.eu\)](#)).

### **5. Construction tech Conference, July 19<sup>th</sup>-20<sup>th</sup> 2023 Chicago, Illinois**

Previously known as our Projects Conference, we covered the topic in three parts: pre-construction and estimating, project oversight and business intelligence, and smart jobsites. Additionally, we hosted a separate conference to explore advanced equipment and robotics. As these topics have increasingly converged, the Construction Tech Conference is intended to look holistically at how technology is influencing the way we build – from pre-construction through construction functions, in the office as well as in the field. It will be a lot to cover in two days, and, with so much happening, it will surely be an exciting event.

Leading technology adopters, mature solution providers, and upcoming technology solutions gather each year to take the pulse of trends across the industry at the BuiltWorlds Construction Tech Conference.

### **7. GreenBuilding Expo, September 26<sup>th</sup>-28<sup>th</sup>, Washington D.C.**

Presented by The U.S. Green Building Council (USGBC), Greenbuild is returning in 2023, this time in Washington, D.C. There are over 200 educational sessions combined with another 400 industry speakers and keynotes discussing sustainability, networking and more. On-demand sessions are available after the event (2022's is available now). Connect with thousands of green building professionals this September and discuss the development of healthier buildings, workspaces, communities, and resilient infrastructures.

**8. Lean Construction Institute Congress, October 24<sup>th</sup> – 27<sup>th</sup>, Detroit USA**

Gain new ideas and perspectives that will enrich your work and drive your Lean practice forward. Playing a vital role in the ever-evolving design and construction industry for 25 years, Congress is where your Lean community comes together for unparalleled knowledge-sharing across disciplines. Attendees come back year after year to reconnect while sharing experiences and successes—and return home with critical, actionable knowledge.

Join more than 1,400 of your colleagues and industry leaders for the Lean event of the year. You will have the opportunity to earn continuing education credits, engage in cutting-edge Lean methods, and network with your peers and Lean leaders. Registration details will be available soon.
